

# How to use the My Equipment feature on Parts.cat.com

This guide will show you how to use the [My Equipment](#) feature on Parts.Cat.Com, so you can start enjoying all the benefits of Cat parts online shopping.

The My Equipment feature will help you shop and find the right part that fits your equipment.

When your Parts.cat.com user account is linked to your Toromont account number, you will have an already populated equipment list based on the information your dealer has.

## Select Equipment

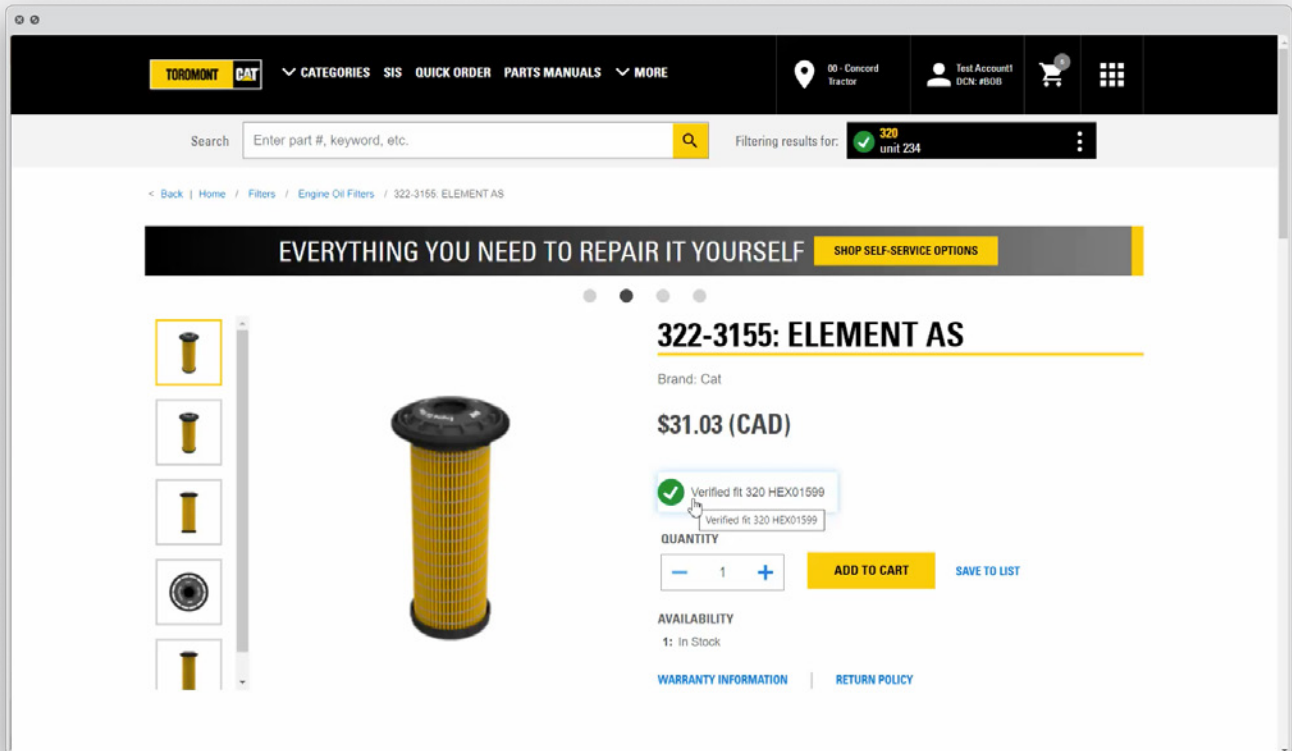

On the homepage, click on [Select Equipment](#) and then [Select](#); you'll see a list of equipment to choose from for your search. If the equipment you are looking for is not on the list, you can then click on [Add Equipment](#). Enter the equipment model or serial number and search. Select the model and a window will appear to enter your asset ID and Cat serial number.

You can enable the [Share equipment with Dealer](#) button if you wish your dealer to receive a notification to add this equipment to your account in the database. Then Save equipment.

By selecting an equipment from your list, the search results will automatically offer a more limited subset of parts that will apply only to your selected equipment. This helps you get closer to the right parts without requiring specific machine information.

[My Equipment](#) feature allows you to save your assets making it easier for additional searches when you return to the site in the future.

A green check mark appears offering you peace of mind and greater confidence you'll get the right fit.

## Parts pages

Once the search gets you the right part, great care has been given to make sure we offer complete information to help confirm you found the correct item.

Parts pages on Parts.cat.com show relevant information like description, specifications and parts diagrams when a serial number has been included. You can see what's related or nearby parts you may want to consider based on the area of the equipment you'll be working on.

If you are ready to move into the checkout process, click [Add to Cart and Checkout](#).
